Cool Your Home This Summer with Convair Portable Evaporative Air Coolers

(29th April, 2009) – According to meteorologists, temperatures in August 2009 are predicted to reach a remarkable 30°C, setting the scene for a sizzling summer with temperatures well above the UK average. Before the temperatures rise, now is the time to invest in portable coolers. Due to the sub-zero weather conditions experienced during winter 2008, many retailers are not re-stocking air coolers in large quantities – so get in quick now to avoid disappointment. An ideal solution is a portable bioclimatic cooler such as the Convair Portable Evaporative Air Cooler, Australia's leading air cooling product – and they know what heat is!

Convair coolers provide an excellent solution to keep the home cool over the summer. They provide a high cooling effect whilst utilising little energy (less energy than a 100W light bulb), operating with windows and doors open and providing steady cooling in a safe, cost-effective and environmentally friendly way. Using the same principles as nature to cool, Convair coolers allow you to enjoy naturally cooled, clean fresh air and gentle 'sea breezes'. Evaporative cooling works by drawing fresh air through a partially open door or window and cooling it naturally by passing it through water soaked filter pads, providing cooled air that is refreshingly natural.

Traditional refrigerative units only work with windows and doors closed, whilst, during warmer weather, most people prefer fresh air circulating through their living rooms, bedrooms, conservatories etc. Convair meets this requirement, working most effectively when windows and doors are open, and using no refrigerant chemicals, it is very environmentally friendly. A Convair cooler is also extremely lightweight and it can be easily repositioned.

Convair coolers are proven to out-perform all other evaporative coolers and are outstandingly more powerful than other, generally Far-Eastern, evaporative coolers offered, which are relatively ineffective. With its superior quality, Convair is capable of lowering the air temperature by around 30%, delivering over 4 times more cooling power than the nearest competitive products.

Convair portable evaporative air coolers are distributed in the UK exclusively by Scott Brothers Ltd and retail from £199.99. All units are guaranteed for 2 years.

Convair Portable Evaporative Air Coolers are available in stores now. For details of your nearest stockist, please call Scott Brothers on +44 (0)1477 539 500, alternatively e-mail sales@scott-air-cooling.co.uk or visit www.scott-air-cooling.co.uk
