## **SCOTT BROTHERS APPOINTED TO SELL CONVAIR COMMANDER 3000**

(15<sup>th</sup> January, 2009) Scott Brothers Ltd., the specialist distributor of innovative portable cooling solutions, has been appointed by Seeley International as sole distributor of the Convair Commander 3000 evaporative cooler. The new addition to Scott Brothers' diverse range of coolers provides a solution to every type of working environment, including commercial, factory and industrial applications. Mobile cooling units are ideal as temporary cooling solutions, particularly suited to the hire and professional trade markets. Hiring a mobile air conditioner is a quick, easy, cost effective and hassle free option when air conditioning is needed in a hurry.

Portable evaporative coolers are ideal for many applications including warehouses, factories and offices in addition to surgeries and laboratories, hotels and schools, and shops and restaurants. Scott Brother's range of coolers for the hire and industrial markets includes the successful Mastercool, 900 Prestige and Breezair units, which enable areas from 20m<sup>2</sup> to 120m<sup>2</sup> to be cooled effectively using portable equipment. The Convair 900 Prestige combines the ultimate in elegance with superior performance, conditioning and renewing the air for a room area of 14-18m<sup>2</sup>. The Breezair Mobile Evaporative Cooler EA120SVM is capable of reducing the ambient temperature in larger spaces by 20-30% in order to create a more pleasant and healthier working environment. The unit is very convenient for use at events and has many outdoors applications, thus is particularly suited to the hire and professional trade markets.

Evaporative coolers produce fresh cooled air without the need for an exhaust hose and are also ideal for large open plan areas, making them particularly suited for use at weddings, corporate functions and events, even marquees. They are extremely simple to hire and use, cooling the air by an evaporation process, which reduces the temperature of the room, whilst simultaneously delivering a constant flow of fresh, filtered, healthy natural air. Unlike conventional air conditioners, evaporative coolers require fresh air, and work best with open windows and doors. They also filter dust and dirt and do not dry the air.

Evaporative air coolers work particularly well as "zone coolers" when it is impractical to try to cool a large room where staff are only working in one area. Mobile cooling units provide an economical alternative to fixed air conditioning as the cost of running an evaporative air cooler is approximately one-tenth of a refrigerative portable air conditioner. Portable air cooler hire is perfect for situations where fixed air conditioning is just not a viable option.

The Convair Commander 3000 conditions and renews the air for a room area of 22-30m<sup>2</sup>, with an air flow of 1355 m<sup>3</sup>/h at full speed. As an evaporative air cooler, it does not require any piping to duct the hot air and should be positioned by an open window or door. It is very economical and quiet using less power than a 100 Watt light bulb and will reduce the air temperature by 20-30%. Equipped with a large capacity 18 litre water tank, the Commander is powerful, providing maximum comfort cooling, highly suitable for industrial applications.

For further information on the Commander 3000 please contact Scott Brothers on +44 (0)1477 539 500, alternatively e-mail [sales@scott-air-cooling.co.uk](mailto:sales@scott-air-cooling.co.uk) or visit [www.scott-air-cooling.co.uk](http://www.scott-air-cooling.co.uk)
