**Scott Brothers Exhibits Energy-Efficient Range of Portable Coolers at Executive Hire Show 2010**

(27<sup>th</sup> November, 2009) Scott Brothers Ltd., the specialist distributor of innovative portable cooling solutions to the UK hire and retail markets, will exhibit its energy-efficient range of evaporative air coolers for the second time at the Executive Hire Show, Ricoh Arena, Coventry, 3<sup>rd</sup> – 4<sup>th</sup> February 2010, following the successful 2009 show. Scott Brothers is the sole distributor of the Seeley range of portable evaporative coolers for the UK and Ireland and will be highlighting a number of coolers from the Seeley Convair and Breezair range.

The coolers are suitable for cooling an extensive number of environments from home use through to larger warehouses and marquees. Convair portable evaporative coolers are compressor free and use no CFCs, alternative green house gases or refrigerant gases, presenting a more environmentally friendly solution to air conditioning.

Duncan Pratt-Thompson, General Manager at Scott Brothers Ltd comments, “We are very excited to be exhibiting at our second Executive Hire Show as last year’s show was a huge success for us. As a result we have taken a larger stand this year which will give buyers the opportunity to see the best selection of portable evaporative coolers in one place. There will be demonstrations of the energy saving Mastercool cooler showing the principle of how all the coolers work and a chance to view our evaporative coolers website [www.scott-air-cooling.co.uk](http://www.scott-air-cooling.co.uk) specifically designed for the hire trade market.”

Displayed at the show will be the Convair series of portable coolers, which are ideal for the hire and industrial markets. The range includes the successful Mastercool, Prestige and Commander (favourite of the hire industry), which are suitable for rooms and offices from 15m<sup>2</sup> up to 30m<sup>2</sup>. In comparison to traditional coolers Convair coolers deliver superior air quality and use less energy than a 100W light bulb, helping to reduce greenhouse gas emissions and save significantly on costs.

Additionally, the Breezair Mobile Evaporative Cooler EA120SVM and EA140SVM with top discharge vent for improved air flow will also be on show. The Breezair line enables larger areas up to 120m<sup>2</sup> to be cooled effectively using portable equipment. Bioclimatic coolers provide a high cooling effect whilst using little energy and use no refrigerant chemicals, providing steady cooling in a safe, cost-effective and environmentally friendly way.

Duncan comments “Scott Brothers is focused on developing wide spread adoption of energy-efficient portable evaporative coolers in the hire industry, suitable for cooling a large number of facilities from homes, offices and smaller rooms such as a conservatory or bedroom, through to factories, large warehouses, mezzanine floors, showrooms, shops, conference halls, temporary tents and marquees. Our energy-efficient coolers offer a practical, clean and safe alternative to conventional air conditioners that can be expensive and environmentally harmful.”

From its purpose-built base in Cheshire, Scott Brothers offers complete stock and full spare parts support in addition to a technical helpline and on-site training to trade and hire customers. For more information on the range of portable evaporative coolers, please visit Scott Brothers Ltd on stand E38 at the Executive Hire Show 2010.

The units can be ordered directly from Scott Brothers, for delivery within 7 days in the UK. Please call +44 (0)1477 539 500, alternatively e-mail [sales@scott-air-cooling.co.uk](mailto:sales@scott-air-cooling.co.uk) or visit [www.scott-air-cooling.co.uk](http://www.scott-air-cooling.co.uk)
