## **SCOTT BROTHERS ADDS NEW COOLER TO EVAPORATIVE AIR COOLING RANGE**

(6<sup>th</sup> April, 2010) Scott Brothers Ltd., the specialist distributor of innovative portable cooling solutions to the UK hire and retail markets, announces the launch of the new Honeywell CL60PM evaporative air cooler.

The Honeywell CL60PM is a unique large evaporative air cooler with an enviable 60 litre water tank capacity suitable for a number of commercial spaces such as factories, warehouses, mezzanine floors, sports centres, fitness centres, shops, showrooms, conference rooms and marquees. The CL60PM is equipped with a powerful motor and a maximum airflow of 2,800 m<sup>3</sup>/hr air flow rate from a low energy (220 watts) motor delivering an environmentally friendly yet robust cooler system. Scott Brothers Ltd has been appointed as the sole distributor of the Honeywell CL60PM for the UK and Ireland, for all markets including the hire, industrial, domestic and retail.

The evaporative air cooler is extremely energy efficient featuring a built-in water overflow protection system allowing it to connect to a continuous water supply ideal for industrial applications. The CL60PM also dramatically reduces air temperature providing sufficient cooling to any work space, creating a pleasant environment leading to increased efficiency and improved moral.

First shown at the Executive Hire Show 2010 in Coventry earlier this year, the Honeywell CL60PM received a great deal of interest for its versatility and economical features, boasting substantial energy savings and low energy consumption. The portable evaporative air cooler also features oscillating louvres to evenly distribute air around the room. Purposely designed as an environmentally friendly alternative to refrigerative fixed air conditioning, the portable air cooler is an easy and cost effective solution to the erratic and unpredictable British climate, as hire companies are starting to stock portable air coolers in expectation of a rise in demand as weather improves in the UK.

Duncan Pratt-Thompson, General Manager at Scott Brothers Ltd., comments, "The CL60PM evaporative air cooler uses advanced Direct Evaporation technology to cool the air, offering maximum cooling comfort. It is built with three large honeycomb cooling medias, a powerful motor and user friendly mechanical controls delivering excellent performance. Designed with three speeds for optimum cooling, the CL60PM lowers surrounding temperature and humidifies the air through the principle of water evaporation, providing a versatile and economical way to deliver a constant flow of fresh, filtered and natural air."

Evaporative air coolers are the low cost, low energy, environmentally friendly alternative to refrigerative fixed air conditioning. Unlike conventional air conditioners, evaporative coolers require fresh air, and work best with open windows and doors. Evaporative air coolers are extremely simple to use, cooling the air by an evaporation process, which reduces the temperature of the room, whilst simultaneously delivering a constant flow of fresh, healthy natural air. They also filter dust and dirt and do not dry the air.

Scott Brothers offers complete stock and full spare parts support in addition to a technical helpline and on-site training to trade and hire customers. For more information on the Honeywell CL60PM, please call Scott Brothers on +44 (0)1477 539 500, alternatively e-mail [sales@scott-air-cooling.co.uk](mailto:sales@scott-air-cooling.co.uk) or visit [www.scott-air-cooling.co.uk](http://www.scott-air-cooling.co.uk).
